

# Build a Connected Change Ecosystem with Tigerhall

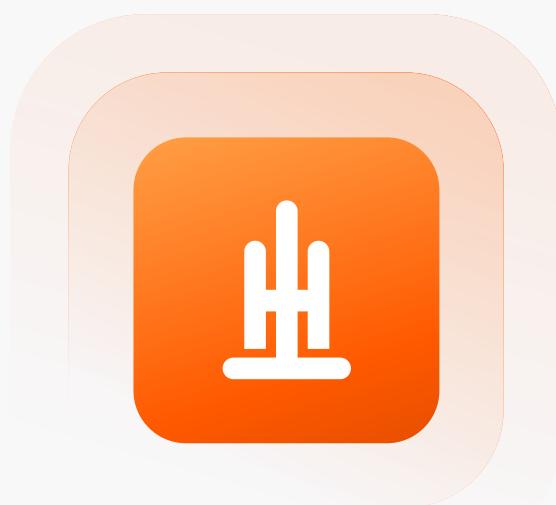

You've got an LMS for training. An intranet for updates. Collaboration tools for day-to-day work. Maybe a CRM and ERPs layered on top. And SharePoint for everything else.

Important change content lives in ten places; none of it where employees work.

**Unsurprisingly, critical information gets ignored, overlooked, or misunderstood.**

## The Challenge

- ✗ Employees miss updates because they're scattered across tools or buried in inboxes
- ✗ Change teams spend more time coordinating links and reminders than driving adoption
- ✗ IT gets roped into "small" link configuration requests that turn into months of work
- ✗ Leaders don't have a consolidated view into whether information is being consumed

## Your Organization's One-Stop Change Hub

Tigerhall's Change Activation Platform links to and from your digital ecosystem, connecting separate tools and pushing change content into workstreams without heavy lifting from IT or transformation teams.

### OUTBOUND LINKING

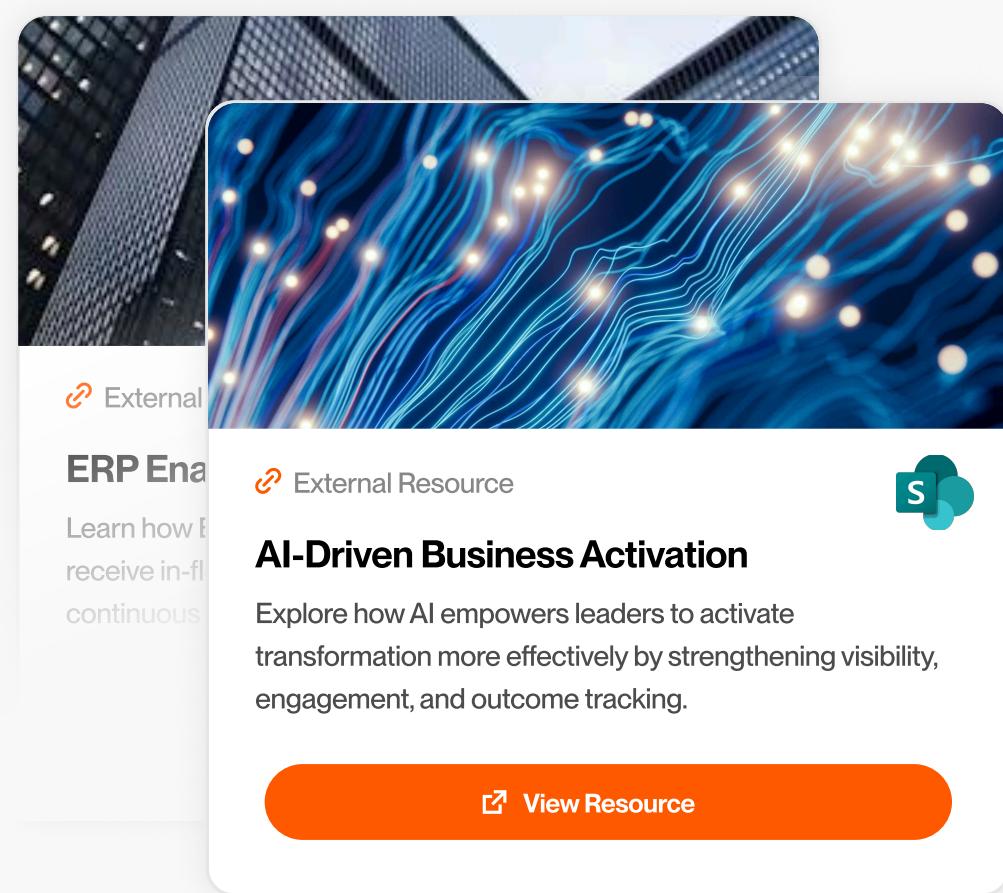

**Guide the right action within the right context**

#### Modernizing Your ERP Change Journey

Most transformation teams want clarity on how different systems can link together to create a unified experience for employees. You can explore recent examples of cross-platform implementation in our [Digital Adoption Case Studies](#).

A collection of internal case studies documenting how different teams connected ERP, CRM, and workflow systems to improve digital adoption and daily execution.

[View Resource](#)

Embed hyperlinks directly inside text-based Tigerhall content, where their required actions become natural next steps.

Create content tiles with buttons directing teams to any destination: LMS modules, SharePoint resources, or Teams discussions.

“

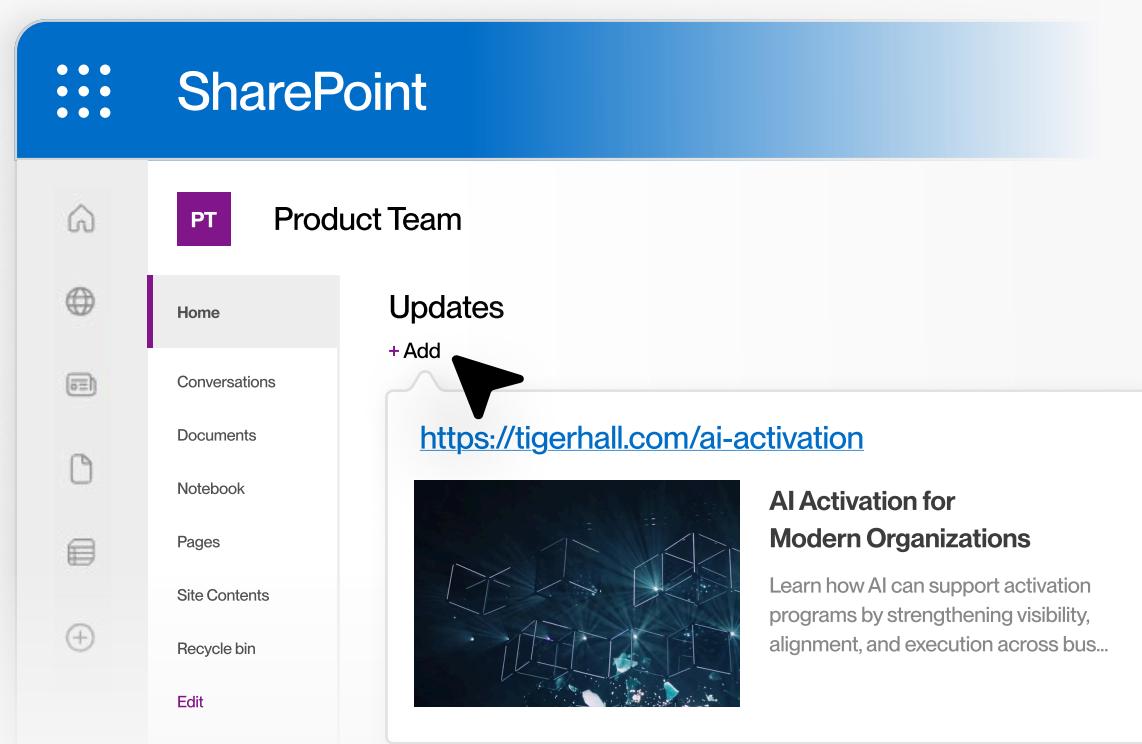

**We want one narrative, even when driving change in multiple tools**

You're launching a new performance framework. Employees learn why this benefits them through leadership videos, champion-led podcasts, and live manager Q&As on Tigerhall, then click on content cards that take them to performance training modules and policy documents. Completion is tracked automatically, so leaders can see who's engaging at any point of the rollout.

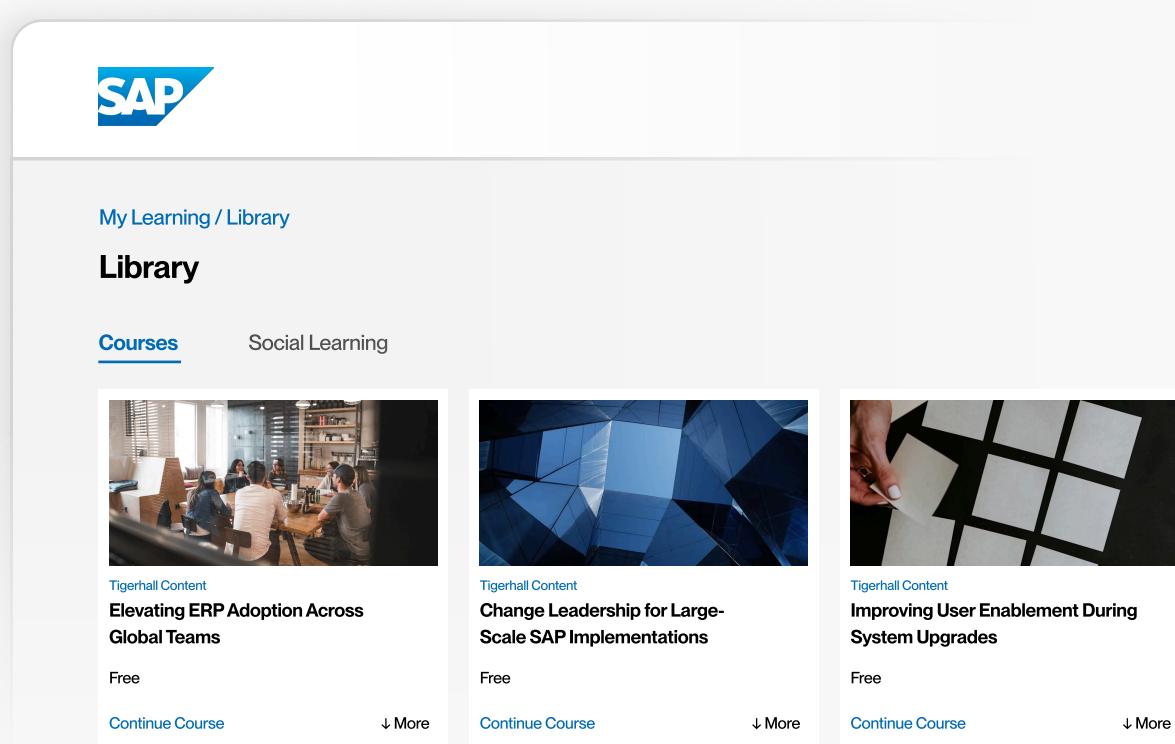

## INBOUND LINKING

### Meet employees where they are

Bring change content into the flow of work. Start with simple hyperlinks, or integrate Tigerhall with your existing systems when you're ready to scale execution.

A screenshot of a SharePoint 'Updates' page. The page has a blue header with the SharePoint logo and a 'Product Team' tag. The left sidebar shows navigation options like Home, Conversations, Documents, Notebook, Pages, Site Contents, Recycle bin, and Edit. The main content area shows a card with a purple header 'Updates' and a '+ Add' button. Below the button is a link 'https://tigerhall.com/ai-activation'. The card also features a thumbnail image of a 3D cube network and the title 'AI Activation for Modern Organizations'. A black arrow points to the link 'https://tigerhall.com/ai-activation'.

A screenshot of an SAP SuccessFactors 'Library' page. The page has a white header with the SAP logo and a 'My Learning / Library' tag. The left sidebar shows navigation options like Courses and Social Learning. The main content area shows a grid of three cards, each representing a Tigerhall course. The first card is titled 'Elevating ERP Adoption Across Global Teams', the second 'Change Leadership for Large-Scale SAP Implementations', and the third 'Improving User Enablement During System Upgrades'. Each card includes a thumbnail image, the course title, a 'Tigerhall Content' label, a 'Free' price indicator, a 'Continue Course' button, and a 'More' link.

Link to Tigerhall content anywhere hyperlinks are supported, such as intranets, SharePoint, LMS course descriptions, and emails.

Integrate Tigerhall with SAP SuccessFactors or other systems to display content natively and automate data syncing.

“

**We need adoption in the flow of work, not just awareness**

During an S/4HANA rollout, you integrate SAP Enable Now with Tigerhall.

Users logging into the system can also find Tigerhall content alongside Enable Now resources, creating a seamless end-user experience. Engagement and completion data sync automatically, giving leaders visibility into readiness and adoption across regions.

## The Outcomes

- ✓ One central place to find change updates and resources.
- ✓ An automated, consolidated view of engagement and progress, without needing manual input or piecing together data from multiple sources.
- ✓ Fewer emails saying “the link is here” or “go to A for this, go to B for that”.
- ✓ Faster, easier deployment that protects IT resources and transformation team bandwidth.
